Software Version/Release: 7.31
Subject: PC Reliance Improvements
Proposal: Please allow birthdate to transfer to Horizon; allow home phone rather than business to be the default phone number (or allow us to choose) ; allow imported borrowers from PC Reliance to Horizon be approved (the approved box is not checked for new PC R. users, you must go in to check this or it causes problems later with Horizon); allow new fields added to or ones removed from Horizon to be also changed in PC R; basic codes should not be removed when data is cleared; and have PC R. distinguish between different circ periods based on itype rather than having to remember manually to change them with the extended version or only one circ period with basic.

Subject: Exception Reports
Proposal: When an item from a floating collection is checked in via PC Reliance, then the resulting exception report should not have these included. Currently these are being listed as transit items, along with items that really are transit items.
If it is not possible to exclude them from the report then a different type of exception should be created, eg `floating transit`.
