Dynix/Horizon—RPA

Enhancement#: **3873 (08/04/2004)**
Category: RPA
Subcategory: Authorization
Software Version/Release: 1.3.1
Subject: Mask Success URL
Proposal: The success url should not appear in the address bar of the patron`s browser. We can offer remote access only if user name and password are not distributed. Being visible, username and password can be easily copied. This is a showstopper.

Enhancement#: **3951 (09/20/2004)**
Category: RPA
Subcategory: Authorization
Software Version/Release:
Subject: Ability to use significant digits
Proposal: Provide the option for patrons to login using significant digits.

Enhancement#: **4220 (03/21/2005)**
Category: RPA
Subcategory: Authorization
Software Version/Release: Version 1.3 (?)
Subject: Secure RPA Via HTTPS
Proposal: Enable RPA to run under https (secure connection).
Our RPA allows people to use their social security number to authenticate. Some of them have raised privacy concerns. They suggested using the secure https protocol.
